Musings on Mental Health

Many Thanks to our 2019 Summer Interns

This summer, we have had thirteen interns working here in New York City with Columbia faculty and post-docs to advance mental health research, policy and advocacy.

To name just a few projects: Interns were engaged in developing e-learning training modules, researching mental health providers' attitudes towards prescribing psychotropic medications, and coding qualitative interviews about interpersonal violence and mental health. They are the next generation of global mental health stewards, and they are already making a world of difference.

Meet Our 2019 Student Interns
